submissions:

31 July 2024

Message from the Guest Editors

Dear Colleagues,

Cardiovascular medicine is changing rapidly with the development, testing and introduction of new diagnostic and therapeutic methods.

This Special Issue will highlight the latest findings in the field of cardiovascular diseases, including the pathogenesis and mechanisms underlying the development of CVD, with a particular emphasis of new techniques and methods for personalized monitoring, diagnosis and treatment. We would like to highlight three desired publication topics:

- 1) Clinical and epidemiological studies and systematic reviews with a focus on the management of cardiovascular disease;
- 2) Scientific and clinical, from all areas of cardiovascular imaging, including echocardiography, magnetic resonance, computed tomography, nuclear and invasive imaging, and the role of invasive intravascular imaging in advancing our understanding of the pathophysiology of atherosclerosis.
- 3) The development and investigation of new CVD markers, e.g., biochemical, cellular and imaging parameters which offer further refinement.

Authors are invited to contribute reviews, original papers and case reports.

Dr. Vilnis Dzerve

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*General Medicine*)
